

Collaboration for Ongoing Visitor Experience Studies

Ryan Auster, Museum of Science, Boston

COVES is designed to unite science centers in systematically collecting audience-level data, to help decision-making, with a focus on institutional and field-wide improvement.

How long did they stay /
What motivated them to visit /
Did they visit the gift shop /
What mode of transportation
did they use to get here?

most?

What percentage of visiting groups
come with children under the age
of 3?

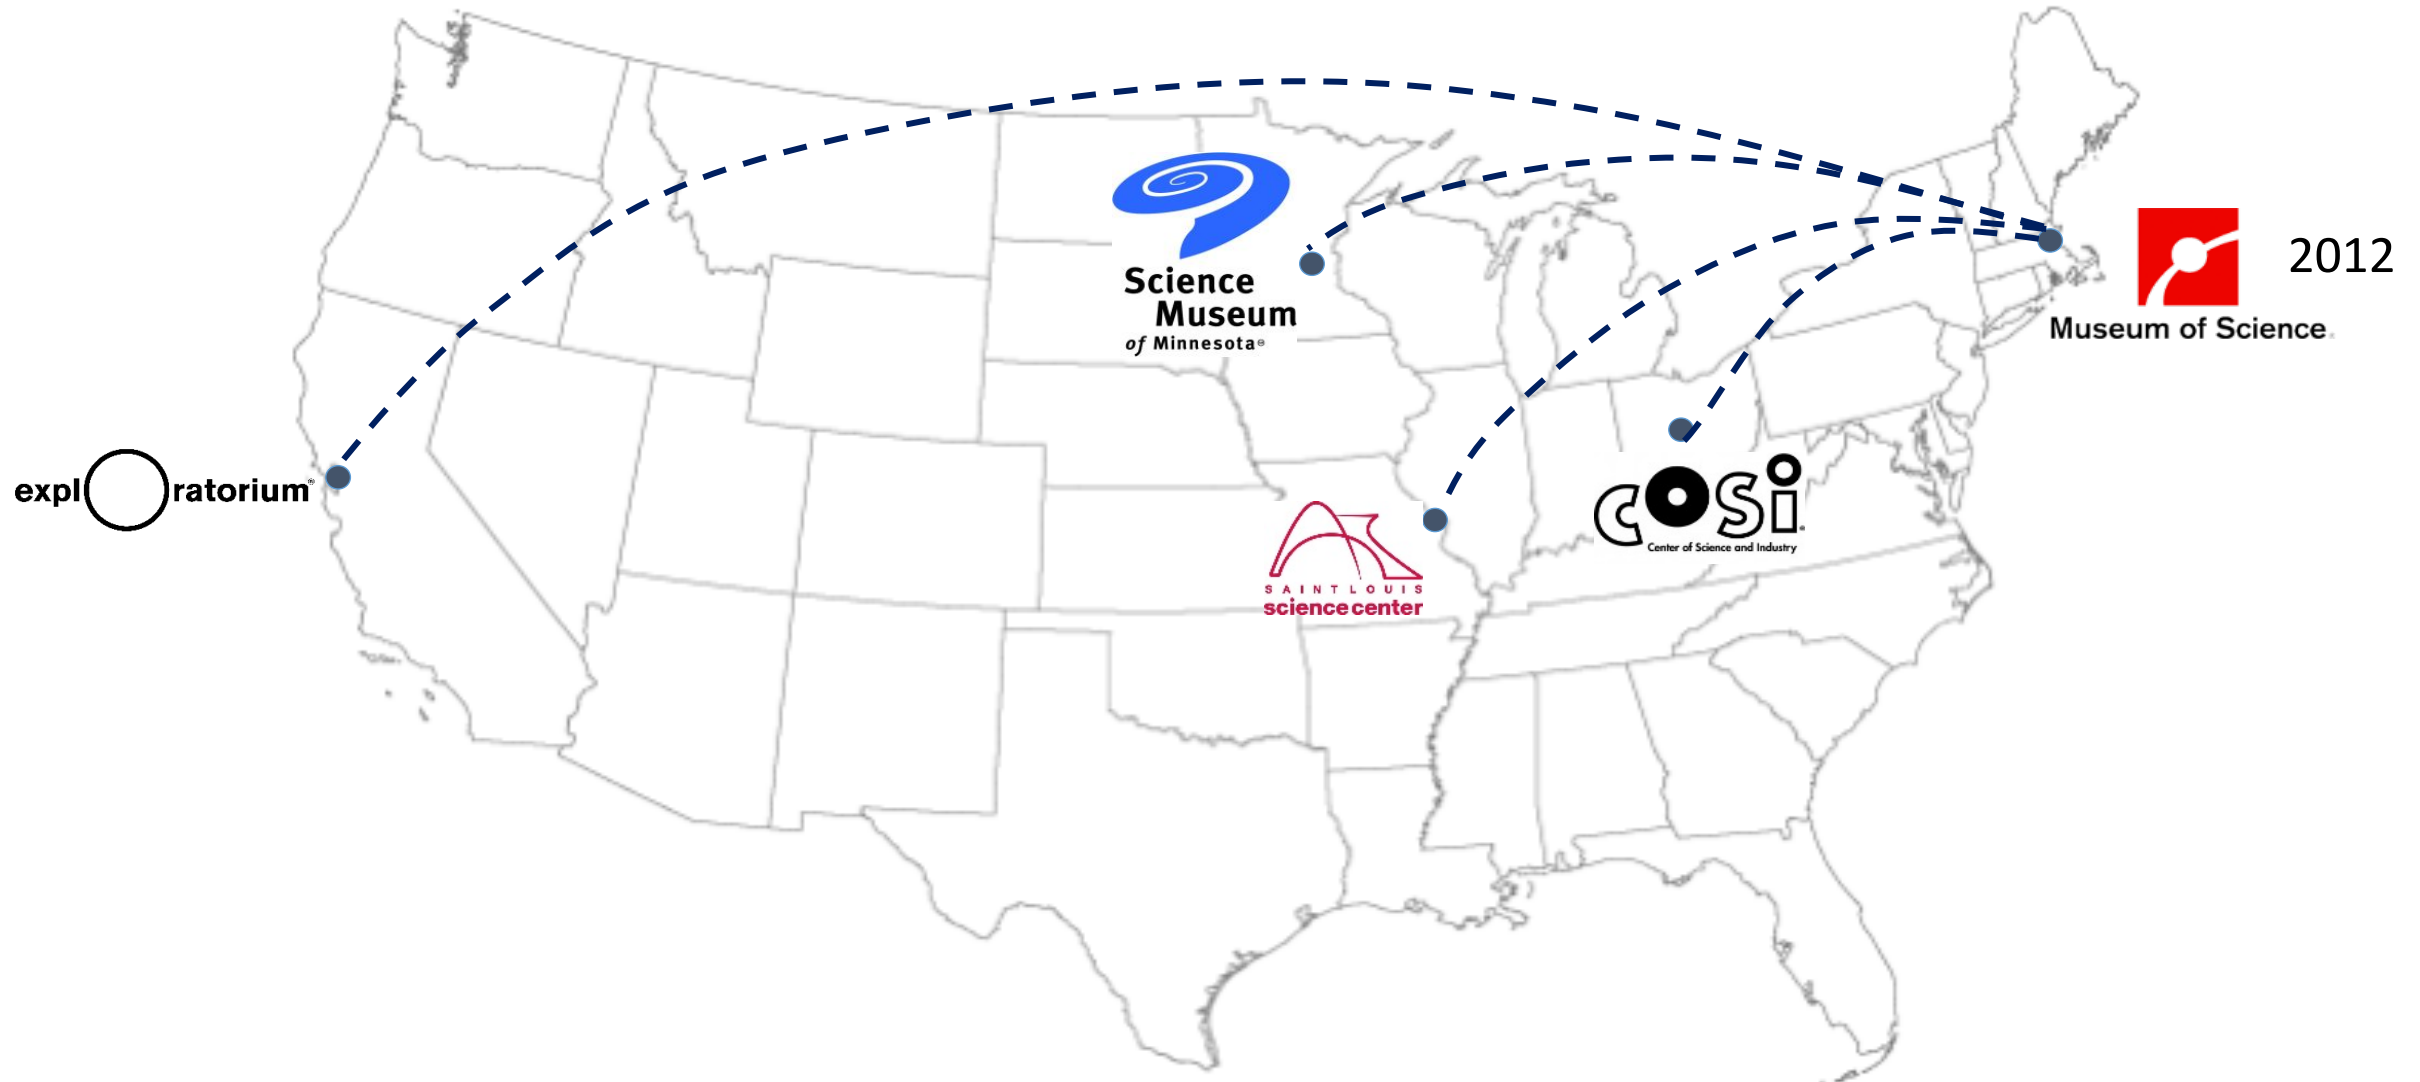

What percentage of those groups
have an additional child of any age
in their group?

What is our Net Promoter Score?
Is that *good*?
What should it be?

WE ARE DROWNING IN
INFORMATION
WHILE STARVING FOR
WISDOM

How do we compare?

Siloed Studies...

Creating a unifying system

COVES

DISCOVERY PLACE

provides:

- a common instrument & shared measures
- institutional flexibility
- analytical assistance
- evaluation capacity building resources
- dynamic reporting
- systematic comparison

NEED DATA COLLECTION GUIDANCE? CHECK OUT THE COVES ...

By: Michelle M. Kenner , 16 days ago

New documents are up in the resource library! Check out Data Collection Key Points , which is a great document to train new data collectors who were not able to attend the onsite training. The 2016 Report Placemat Walk-through explains each section ...

VISITOR CONFUSION WITH EXPERIENCE RATING QUESTIONS

By: Alexander Lussenhop , 22 days ago

Hi all, I received a couple of questions from data collectors recently about visitor confusion with the museum experience ratings on the COVES survey and thought the answers might benefit more people. The museum experience rating questions display differently ...

Welcome to the COVES CoP! Here you can:

- Connect with members of the COVES team and staff at other participating institutions
- Access members-only resources, such as aggregate reports, training webinars, and capacity building documents
- Keep up-to-date with the latest COVES news and events

CoP Moderator:

We study:

Who visits

Why they visit

What they see & do

How they feel

Why develop the system?

Quality

Efficiency

Flexibility

Cost

Why develop the system?

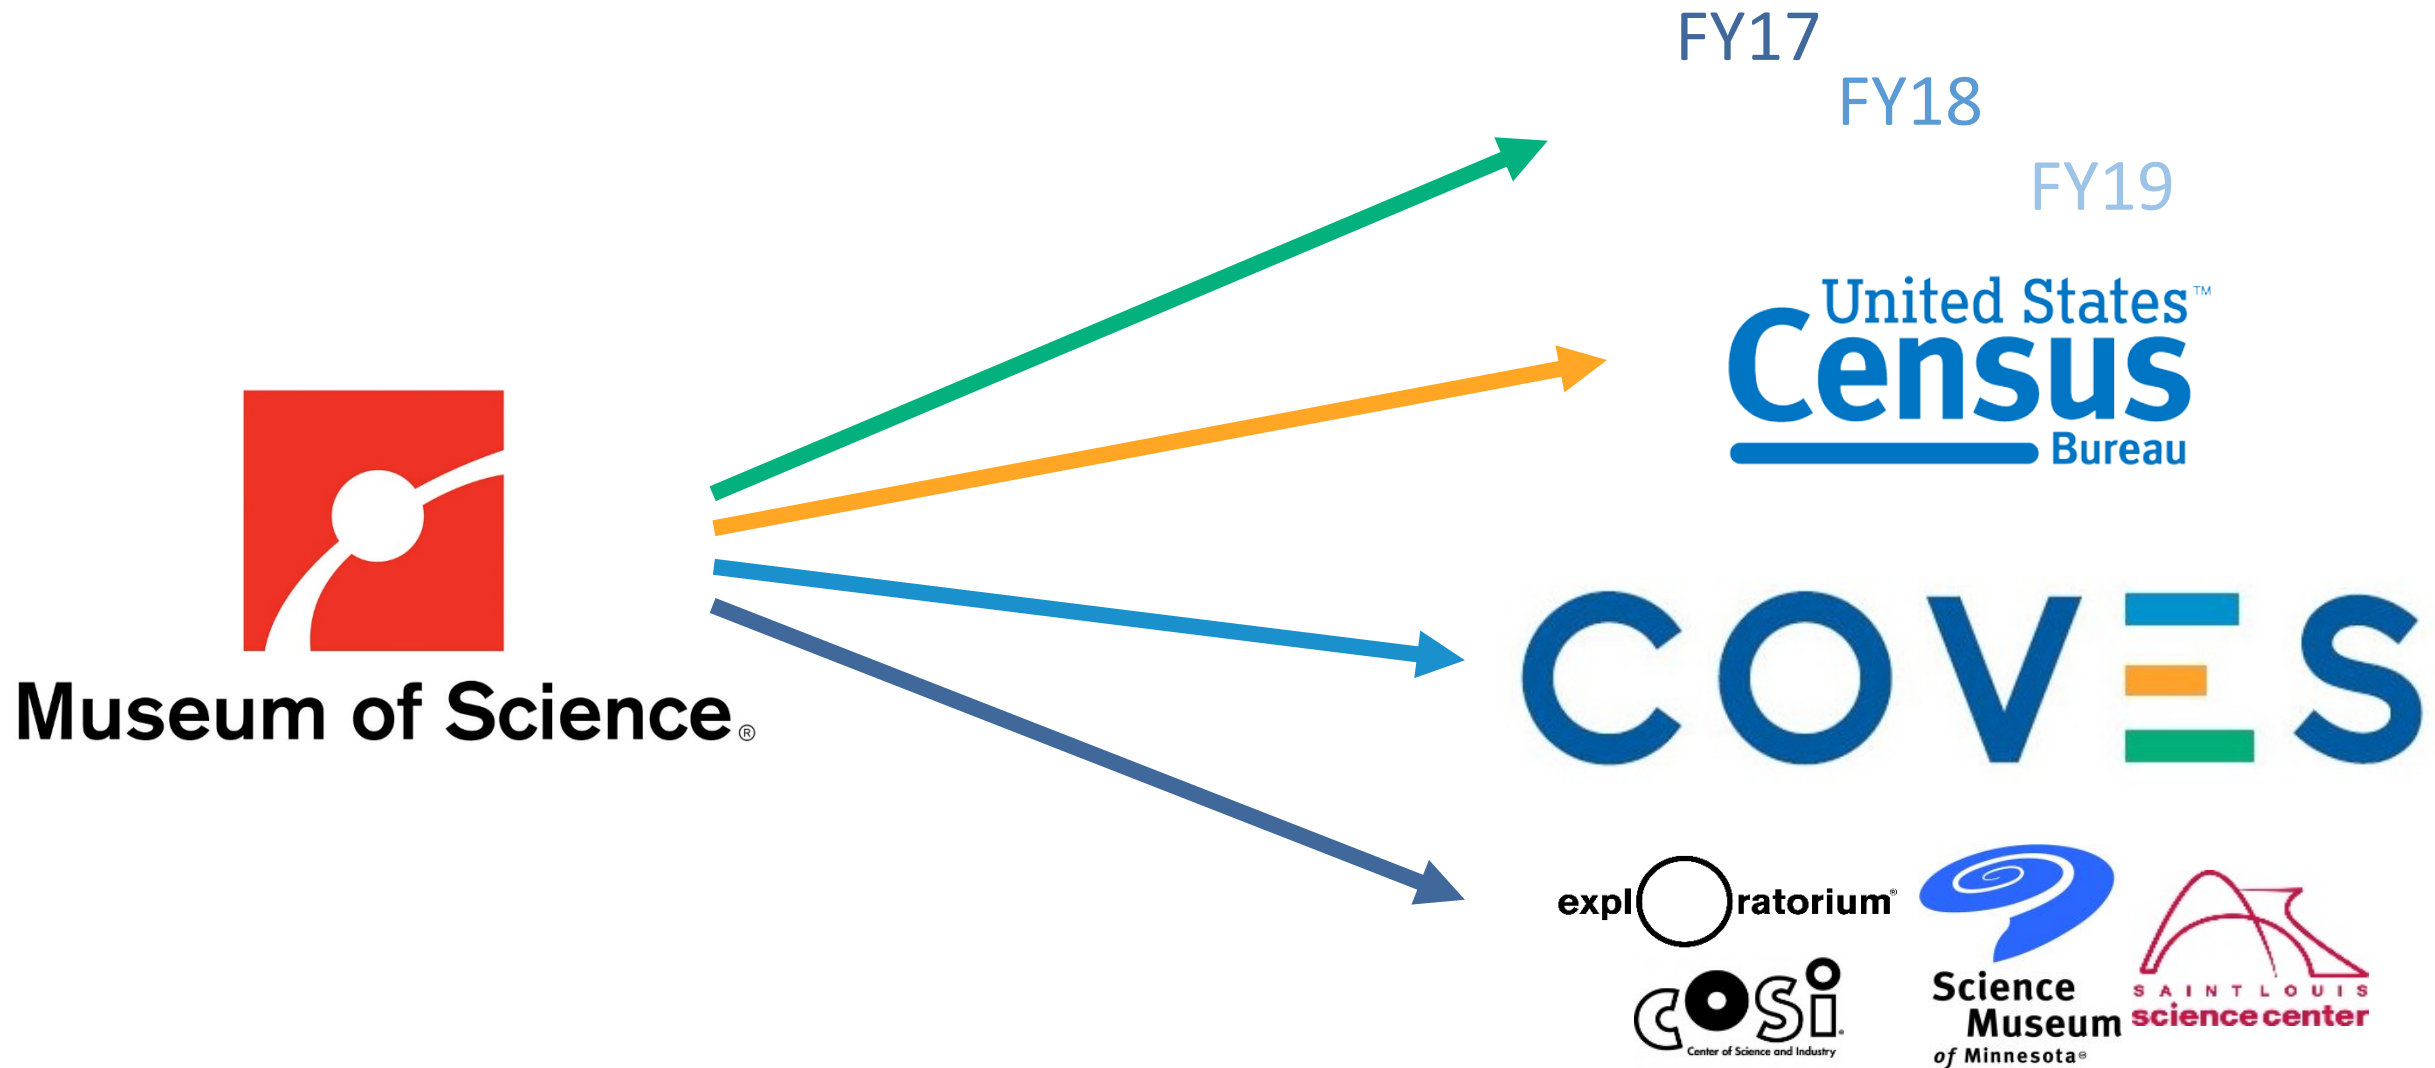

Using the data & insights

- To date: $N > 13,000$
(visiting groups)
- Avg. response rate 59%
[institutional response
rate range 33% to 95%]

Sightseeing groups

“Thanks to COVES, we have been reflecting on and improving our practices for surveying our visitors about their experiences. We’ve also been standardizing our questions and methods.”

expl  ratorium®

“Being a small/medium size museum, we do not have the resources that are required to gather valuable visitor information. This powerful tool enables our museum to serve our community better and thereby serve our mission.”

Challenges

- Data collection → only a few sites
- Institutional buy-in → one “champion” often insufficient
- Creating a culture of change → must come from within
- Designing a better reporting mechanism → scalability and timeliness

Opportunities

- Becoming a central hub for understanding museum visitors across fields (Evaluation Capacity Building)
- Field-wide research questions
- Continued expansion & language translation

¡Hola!
Me llamo [nombre].
Trabajo aquí en el **Museo de la Ciencia**. Estamos realizando una breve encuesta sobre las experiencias de nuestros visitantes...
